Power Platform Solution Architect

24 horas

Microsoft Power Platform | Power BI

Microsoft

INTRODUÇÃO

The Solution Architect is responsible for the successful design, implementation, deployment and adoption of an overall solution. The Solution Architect ensures that the solution meets the customer's needs now and in the future. In this course, students will learn about decisions a Solution Architect makes during an implementation, covering security, integrations, Power Apps architecture, Power Automate architecture, and more. This course is designed to give you an introduction to the Solution Architect role.

OBJETIVO DO CURSO

-

PÚBLICO-ALVO

Audience Profile

Senior Consultants (both functional and technical) that aspire to be Solution Architects, or current Solution Architects that are new to the role.

PRÉ-REQUISITOS

Course outline

Module 1: Architect solutions for Dynamics 365 and Microsoft Power Platform

A Solution Architect is responsible for the successful design, implementation, deployment, and adoption of an overall solution. A Solution Architect ensures that the solution meets the customer's needs now and in the future. While the Solution Architect may not "click the buttons" during a deployment, they are ultimately responsible for the solution and work closely with the deployment team.

- Becoming a solution architect for Dynamics 365 and Microsoft Power Platform
- Discover customer needs as a Solution Architect for Dynamics 365 and Microsoft Power Platform
- Propose a solution as a Solution Architect for Microsoft Power Platform and Dynamics 365
- Work with requirements as a solution architect for Microsoft Power Platform and Dynamics 365
- Perform fit gap analysis

Module 2: Solution Architect: Design Microsoft Power Platform solutions

A Solution Architect should have functional and technical knowledge of Microsoft Power Platform, Dynamics 365 apps, related Microsoft cloud solutions, and other third-party technologies. This Learning Path looks at architecture, data modeling, security, and related tasks for a solution architect.

- Solution Architect series: Implement project governance for Power Platform and Dynamics 365
- Solution Architect series: Power Platform architecture
- Solution Architect series: Explore Power Apps architecture
- Explore Power Automate architecture
- Solution architect series: Explore Power Virtual Agents
- Solution architect series: Explore robotic process automation
- Solution architect series: Model data for Power Platform solutions
- Solution architect series: Model security for Power Platform solutions
- Solution Architect series: Evaluate Power Platform analytics and AI
- Solution Architect series: Implement integrations with Power Platform
- Solution Architect series: Plan application lifecycle management for Power Platform
- Solution Architect series: Testing and go-live
