

MS-721T00 (COLLABORATION COMMUNICATIONS SYSTEMS ENGINEER) 2023

Objetivo

-

Público Alvo

Audience profile Collaboration Communications Systems Engineers are responsible for planning, deploying, configuring, maintaining, and troubleshooting Microsoft Teams Phone, meetings, and personal and shared space devices, including Microsoft Teams Rooms and Surface Hub. Collaboration Communications Systems Engineers have a fundamental understanding of networking, telecommunications, audio/visual and meeting room technologies, identity and access management. They are proficient in managing and monitoring Teams Phone, meetings, and certified devices using the Microsoft Teams admin center, PowerShell, the Microsoft Teams Rooms Pro Portal, and the Call Quality Dashboard. They deploy and configure Microsoft Teams Phone with PSTN connectivity through Microsoft Calling Plans, Operator Connect, Teams Phone Mobile, and Direct Routing. Collaboration Communications Systems Engineers work with Teams Administrators, Microsoft Identity and Access Administrators, and Microsoft 365 Administrators. In addition, they may work with owners of other workloads, including facilities managers, network engineers, security engineers, device manufacturers, telephony providers, and Microsoft Certified solutions providers.

Pré-requisitos

Prerequisites Before attending this course, students should have general knowledge of the following topics: • Microsoft 365 and Microsoft Teams • Networking, telecommunications, and audio/visual basics • Identity and access management basics

Carga Horária

32 horas (4 dias).

Conteúdo Programático
