

# MD-101T00-A (MANAGING MODERN DESKTOPS) 2022

---

## Objetivo

-

## Público Alvo

Audience profile The Modern Desktop Administrator deploys, configures, secures, manages, and monitors devices and client applications in an enterprise environment. Responsibilities include managing identity, access, policies, updates, and apps. The MDA collaborates with the M365 Enterprise Administrator to design and implement a device strategy that meets the business needs of a modern organization. The Modern Desktop Administrator must be familiar with M365 workloads and must have strong skills and experience of deploying, configuring, and maintaining Windows 10 and later and non-Windows devices. The MDA role focuses on cloud services rather than on-premises management technologies.

## Pré-requisitos

Prerequisites The Modern Desktop Administrator must be familiar with M365 workloads and must have strong skills and experience of deploying, configuring, and maintaining Windows 10 and later, and non-Windows devices. The MDA role focuses on cloud services rather than on-premises management technologies. It is recommended students complete course MD-100, Windows Client, prior to taking this course.

## Carga Horária

40 horas (5 dias).
